

## Photography and Video Recording Policy

While photography and video recording during medical examinations, tests, and procedures is generally not permitted, the following exceptions apply for obstetric patients only:

- The ultrasound screen during your own prenatal examination at the obstetric outpatient clinic
- During the time you and your baby are together in the LDR room after birth

If you would like to take photos or videos, please let a staff member know. We will inform you when it is appropriate to do so. When recording, please ensure that other patients, doctors, nurses, and hospital staff are not captured in your photos or videos. We kindly ask for your cooperation in protecting everyone's privacy and helping create a comfortable environment for all.

Effective July 2025
