

Notice on husband's attendance in the LDR during labor and delivery

In order to prevent the in-hospital transmission of the new coronavirus infection, **we have established the following conditions for husbands/partners who will be attending the labor and delivery.**

Within one week of the date of your attendance,

- ① **Not having unmasked conversations or meals with non-family members who live with you.**
- ② **No symptoms of new coronavirus infection in the attending person.
(Fever, cough, runny nose, sore throat, fatigue, abnormal sense of taste and smell, etc.)**
- ③ **The person in attendance has not been in contact with a person infected with the new coronavirus.**
- ④ **The person attending does not have a positive test for new coronavirus or is not being tested.**

If the infection spreads more seriously in the future, we may have no choice but to discontinue the attendance of husbands.

We ask that you and your family take good care of your health and daily activities.

The situation is always changing, so please check the Aiiiku Hospital website for more information and understanding.
